

Cedar

CLADDING

WESTERN RED CEDAR CLADDING

North America's Western Red Cedar is renowned for its character and warmth and is widely used in exterior and interior applications throughout New Zealand.

Western Red Cedar is a premium quality and popular solution for exterior cladding and it is available in a wide range of profiles for various applications including cladding, panelling, linings and battens.

Western Red Cedar is a stable softwood that readily accepts a variety of coatings. Variations in colour tone, grain and texture are desirable natural characteristics of Western Red Cedar.
